# NEAR INFRARED LASER SENSOR SYSTEM FOR IN-LINE DETECTION OF CONVERSION IN UV-CURED POLYMER COATINGS

Karlsruher Institut Für Technologie Jul 2014, 2014. Taschenbuch. Book Condition: Neu. 210x148x9 mm. This item is printed on demand - Print on Demand Neuware - The work describes a method for the determination of the conversion by radical photopolymerization of acrylic coatings that is suitable for an in situ monitoring during the coating process. The applied method is based on the 1620 nm overtone absorption of the acrylate end group. The capability of the sensor to discriminate between polymerized and unpolymerized...

## Reviews

*The most effective publication i ever go through. It really is written in simple phrases and not hard to understand. I am just easily will get a satisfaction of looking at a written publication.*

-- **Ila Pfeffer IV**

*Completely essential read publication. It is really basic but excitement in the fifty percent of the book. You will not really feel monotony at anytime of your respective time (that's what catalogues are for about in the event you ask me).*

-- **Lexie Paucek PhD**
