

# Dynamical Systems of Algebraic Origin

By Klaus Schmidt

Birkhauser. Paperback. Book Condition: New. Paperback. 328 pages. Dimensions: 9.3in. x 6.1in. x 0.8in. Although much of classical ergodic theory is concerned with single transformations and one-parameter flows, the subject inherits from statistical mechanics not only its name, but also an obligation to analyze spatially extended systems with multidimensional symmetry groups. However, the wealth of concrete and natural examples which has contributed so much to the appeal and development of classical dynamics, is noticeably absent in this more general theory. The purpose of this book is to help remedy this scarcity of explicit examples by introducing a class of continuous  $Z^d$ -actions diverse enough to exhibit many of the new phenomena encountered in the transition from  $Z$  to  $Z^d$ , but which nevertheless lends itself to systematic study: the  $Z^d$ -actions by automorphisms of compact, abelian groups. One aspect of these actions, not surprising in itself but quite striking in its extent and depth nonetheless, is the connection with commutative algebra and arithmetical algebraic geometry. The algebraic framework resulting from this connection allows the construction of examples with a variety of specified dynamical properties, and by combining algebraic and dynamical tools one obtains a quite detailed understanding of this class of  $Z^d$ -actions. This item...

## Reviews

*A new electronic book with a new point of view. it was written extremely completely and beneficial. Its been written in an extremely straightforward way in fact it is simply following i finished reading this publication through which really altered me, alter the way i really believe.*

-- Dr. Florian Runte

*This is an awesome publication i have at any time read. Of course, it is play, still an interesting and amazing literature. You will like just how the author write this book.*

-- Prof. Herta Mann
